Michael Bengawan
College Undergraduate

Currently a college undergraduate for Binus University Senayan. Have been studying Python, C, and Java. And is interested to becoming a Full Stack Developer. I am mostly calm and collected but can be harsh. I was able to finish all of my Computer Class with great scores. And have experience in using Python, Java, C, HTML, and CSS.

Experience

1 - 7 September 2019
Became a committee at Regina Pacis Star X Event
Committee
Became a committee when I was in high school got to work together with my upper classmates and got along well. We worked together to host a Mobile Legends tournament and successfully did so.

January - June 2023
Competed with a team for Binus University Project Hatchery
Student
I studied a lot about how to communicate with a group of people with this experience as I was put into a group of five people. Learning how to develop ideas and communicate them well.

September - October 2023
Became a teaching assistant for Binus University
Teaching Assistant
Became a teaching assistant for Binus University teaching about python and general coding analysis. Was able to further improve my communication skills and teaching skills throughout this experience. And develop more confidence in myself.

February - June 2024
Became a mentor for Binus University
Student Mentor
Became a Student mentor teaching basic knowledge on mathematics and programming focused on Java primarily. In this experience I developed better time management and continue to develop my confidence in speaking and teaching.

July - August 2024
Became a Event Coordinator for HIMTI
Lead Coordinator
Became a Student mentor teaching basic knowledge on mathematics and programming focused on Java primarily. In this experience I developed better time management and continue to develop my confidence in speaking and teaching.
